The Unified Sustainability Intelligence Platform

One Platform, Every Framework, Verified Forever.

The adaptive intelligence exchange that turns sustainability data into verified action, which is built to outlast every regulation, technology and market cycle.

Category: Unified Carbon Accounting, ESG, Compliance & Sustainability Intelligence Platform

The verified intelligence exchange for planetary compliance.

Verified Environmental Regulatory Data Intelligence Exchange (VERDIX)

Motivation for this platform: https://github.com/awasekhirni/uofw/blob/main/CarbonSinkEnhancements_Proposal_theme1.pdf

Current State

Enterprise Reality

5–10 disconnected systems,
manual reconciliation, and
no single source of truth
across sustainability data

Compliance Risk

CSRD requires limited
assurance — spreadsheets
cannot provide the audit trails
required for regulatory sign-off

Operational Cost

60–70% of team capacity consumed by duplicate data collection
and manual reconciliation work

The Opportunity

Carbon Accounting Software

**\$22.6B (2025) →
\$63.5B (2030)** at 23% CAGR

ESG Reporting Software

\$1.4B (2025) → \$3.9B (2030) at 23% CAGR

Key Drivers

Mandatory CSRD, ISSB, CBAM, and California SB 253 deadlines — amplified by investor demand and supply chain cascading

A Market Accelerating Fast

Why Now: Regulatory Forcing Function

Four Critical Deadlines — All Converging

CSRD Wave 2 — FY2027

Limited assurance required; XBRL tagging mandatory across EU

CBAM & EU ETS Maritime
— Jan 2026

Effective date; embedded emissions tracking required

1

2

3

4

California SB 253 — 2026

Scope 1/2/3 disclosures with mandatory third-party assurance

ISSB IFRS S1/S2 — Active

Adopted in 30+ jurisdictions; financial-sustainability connectivity

Competitive Positioning

Pure-Play Carbon Tools

Deep but narrow – no cross-domain analytics or assurance capability

Legacy EHS Platforms

Enterprise relationships, but slow innovation and high implementation cost

Enterprise Giants

Strong distribution, but sustainability is not core – limited depth across frameworks

VERDIX Advantage

Only integrated platform covering all 7 domains with AI-native architecture and blockchain-ready infrastructure

Multi-Layered Revenue

Revenue Streams

- Platform Subscription
80–85% gross margin; tiered by entities, users, and data volume
- Module Add-ons
Supply Chain, Exchange, Assurance at 80–85% margin
- Data Connectors & Supplier Network
